

# OctoAir10™

CANADIANPOND.CA PRODUCTS LTD

## Industrial Grade Diffuser

10 CFM - 17 M<sup>3</sup>/Hr

Micro bubbles created by the OctoAir10™

OctoAir10™ is a high performance Canadian-made industrial diffuser designed for industries or municipalities.

The OctoAir10™ design includes a rugged stainless steel frame, adjustable legs and 100' (30.5m) of our exclusive non-weighted Bubble Tubing™, which is a flexible PVC diffuser tubing with dual rows of perforations spaced apart on each side along the entire tubing length.

Integral in the design of the OctoAir10™ is a unique clasp system designed exclusively for our Bubble Tubing™.

All our diffusers and tubing are designed to resist deterioration when exposed to a wide range of chemicals, salinity, pH and temperature.

OctoAir10™ requires only adjustment of leg height before installation.

*"Overall, the results obtained for the CanadianPond.ca Products Ltd. aeration systems were uniformly excellent and produced some of the highest SOTE values GSEE, Inc. has observed."*  
GSEE, Inc. Environmental Consultants, LaVergne, TN, Sept. 2011.

### Markets:

- WASTEWATER
- DRINKING WATER
- AGRICULTURE
- AQUACULTURE
- MINING
- ENERGY
- PONDS AND LAKES
- FISH FARMING
- ANY TYPES OF AERATION

## Applications

- AERATION
- DEICING
- AESTHETIC
- WATER LIFTING
- DEGASSING
- MIXING
- PATHOGENE REDUCTION
- WATER CIRCULATION

## Size & Format

- 48" (122CM) DIAMETER (EASY SHIPPING)
- ADJUSTABLE LEG HEIGHT
- CHECK VALVE INCLUDED
- OVERPRESSURE VALVE PROTECTION INCLUDED
- FLOAT HOOKS INCLUDED
- SOME ASSEMBLY REQUIRED
